MASOOD AHMAD

Lösningsarkitekt · Systemutvecklare · Affärssystem/ERP · Integrationer · Svenska: nybörjare (studerar)
Orebro, Sweden • masoodahmad991@gmail.com +46 76 9 76 81 55 https://se.linkedin.com/in/mas991

PROFESSIONAL SUMMARY

Solutions Architect and Technical Leader with 13+ years of experience designing and delivering enterprise systems across procurement, ERP, e-commerce, and business intelligence domains. Led cross-functional teams of up to 20 members, managed 30+ projects for clients in USA, Turkey, Bulgaria, Netherlands, Pakistan and Ghana. Specialized in full-stack architecture, system integration, and digital transformation initiatives.

EDUCATION

Master of Information Systems & Security — Currently Enrolled - 2026
Orebro University, Orebro, Sweden

Bachelor of Computer Science (BCS) Summa Cum Laude **(Highest Achievable Honors)**
University of the People, USA (WASC Accredited) — GPA: **3.88 / 4.0** Conferred January 2026
Relevant Coursework: Information Retrieval, Data Security, Database Systems, Systems Analysis

Additional Qualifications: ACCA Certified Accounting Technician (CAT) Level A,B. — O-Levels

PROFESSIONAL EXPERIENCE

Solutions Architect — ITG, Turkey 2021 – 2024

Full-time employment following initial consulting engagement.

- Architected enterprise VSRM (Vendor/Supplier Relationship Management) system serving 500+ vendors
- Designed multi-entity authentication with role-based access control and privilege management
- Built document management system with versioning, PDF viewer (PDFTron), and Excel/CSV export
- Implemented real-time collaboration using WebSocket, sticky notes, and notification systems
- Managed team of 5 developers, established code review processes.

React 18, TypeScript, Node.js, Express, PostgreSQL, MySQL, Redis, Kendo UI, Material-UI, WebSocket

Independent Consultant, Remote 2014 – Present

Delivering software development, architecture, and team leadership for international clients:

• **ITG** (Turkey, 2021): Initial consulting and contractor engagement for VSRM platform development, system architecture design, and team setup before transitioning to full-time role.
React, TypeScript, Node.js, PostgreSQL, Redis, Material-UI

• **Samsara Solutions** (Bulgaria, 2020–2021): Built accounting & ERP system with Chart of Accounts, double-entry ledger, Trial Balance, P&L statements, purchase order management, and inventory tracking
React, Node.js, TypeScript, PostgreSQL, Redis, Material-UI, Highcharts, Jest

• **WordApp** (Netherlands/Turkey, 2019–2020): Developed content & survey platform integrating CINT and Pollfish APIs. Built event-driven architecture for real-time survey processing serving 50K+ users. Managed AWS infrastructure. *React, Node.js, PostgreSQL, Redis, AWS, Highcharts, Gmail API*

• **PopLeads** (Turkey, 2020–2021): Architected GDPR/KVKK consent management system for Estée Lauder. Built employee training platform with Individual Development Plans (IDP) module.
Angular 8, TypeScript, NgRx, Node.js, MySQL, Magento

• **Alimila / SaglikCafe** (Turkey, 2020–2023): Built multi-vendor health e-commerce marketplace, medical symptom checker with disease prediction algorithm, and online learning platform similar to Udemy.
React, Node.js, TypeScript, PostgreSQL, Redis, Bootstrap

• **CFN Teknoloji** (Turkey, 2020): Designed legal case management system with role-based access, PDF generation, i18n support, and 32+ page frontend application. *React, Node.js, TypeScript, PostgreSQL, Material-UI*

• **Uzmar Bilişim** (Turkey, 2019): Built shipyard enterprise management PWA for maritime vessel construction operations including project tracking, labor management, and warehouse inventory.
React, Kendo UI, Material-UI, React Native

• **SokoPay / Akaditi** (Ghana, 2015–2017): Built Android mobile payment app with MTN Mobile Money integration for airtime, utilities, and fund transfers. Developed AWS backend and admin panel.
Android, Java, AWS, REST APIs, MTN Mobile Money API

• **59 Souls Inc.** (USA, 2015): Built Magento e-commerce site (HamptonGems.com) with PayPal/Amazon payments. Developed cross-platform browser extensions and iOS app for social media overlay system.

Magento, PHP, iOS, JavaScript, Browser Extensions, AWS

• **Telecommunications Company** (USA, 2015–2016): Integrated Google Analytics & MixPanel dashboards for Node.js SPA. Built iframe integration with Drupal documentation site and SSO functionality.

Node.js, Drupal, Redis, Google Analytics, MixPanel

• **Maavan LLC** (USA, 2014): Architected multiple software projects including web crawlers, mobile game management, and real-time group chat platform using pub/sub pattern.

Java EE, Node.js, PHP, Selenium, WebSockets, PostgreSQL

EARLIER EMPLOYMENT

Project Manager & Architect — ITBoost LLC / TheHelpDesk, USA/Pakistan 2017 – 2018

- Managed SaaS IT documentation platform; led migration from AngularJS to React + Redux
- Built Document Management and Asset Management modules; introduced Git Flow and CI/CD

React, Redux, TypeScript, Node.js, Git, CI/CD, Agile/Scrum

Technical Architect — Rolustech, Pakistan 2014

- Managed team of 15 for SugarCRM + IBM Cognos BI integration; configured ETL and SSO
- Created SOWs, replied to RFQs; delivered WordPress theme for Wayne State University (500+ pages)

SugarCRM, IBM Cognos BI, QuickBooks, WordPress, PHP, MySQL, ETL

Software Engineer — Tricast Media, Pakistan 2013 – 2014

- Built chat module for Cricket Companion (PASHA Award winning app); MySQL optimization

Java EE, Struts 2, MySQL

Software Engineer — Syncsys LLC / Cyber Systems, USA/Pakistan 2012 – 2014

- Architected web-based task management app as sole developer (Java EE, Spring MVC, Hibernate)
- Built healthcare portal (Alpinema.com); configured Asterisk VoIP with 40 SIP extensions

Java EE, Spring MVC, Hibernate, PostgreSQL, AWS, Linux, Asterisk

IT & Systems Executive — CCAPS, Pakistan 2011 – 2012

- Managed 40-computer lab, Linux VPS administration, network security, internal development

Linux, Java EE, Networking, System Administration

RESEARCH & INDEPENDENT PROJECTS

AI Orchestration Platform 2026

Independent research exploring multi-agent AI coordination for enterprise applications. Designed distributed microservices architecture with 7+ backend services (brain server, LLM server, voice server, gateway). Implemented real-time WebSocket streaming with auto-retry protocols. Analyzed trade-offs between LLM providers (OpenAI, Anthropic, DeepSeek) for enterprise deployment.

Python, FastAPI, SvelteKit, WebSocket, Redis, Anthropic SDK, OpenAI API

Lead Generation & Talent Management Platform 2026

Redesigned recruitment ecosystem processing 100K+ candidates. Built candidate tracking, resume parsing, online assessment, and automated email campaigns. Integrated WhatsApp API for outreach.

React, TypeScript, Node.js, PostgreSQL, Redis, WhatsApp API

TECHNICAL EXPERTISE

Languages:TypeScript, JavaScript, Python, Java, PHP, SQL. **Frontend:** React, Svelte, Angular, Material-UI, Kendo UI. **Backend:** Node.js, Express, FastAPI, Spring MVC, Java EE. **Data:** PostgreSQL, MySQL, Redis, MongoDB. **Cloud:** AWS, Linux, Docker, CI/CD, Git. **Methods:** Agile/Scrum, System Design, API Architecture, ETL, BI

COMMUNICATION & LANGUAGES

English: Advanced level fluency in written & oral. **Swedish**: Beginner (enrolling in SFI program).
